

Dylan Tarbi “The Sun”

Confirmation 2024 Statement of Faith East Union Presbyterian Church

Hello, my name is Dylan Tarbi and this is my statement of faith and how I am reminded of God’s love each day with the sun.

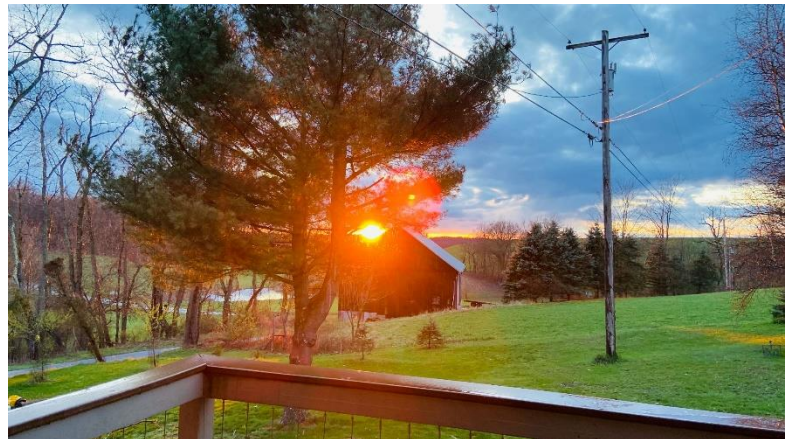

The sunrise every day helps to remind me that today is a new day and a fresh start and because of God’s steady love for me I do not have to worry about what happened in the past.

Just as God forgives me for my mistakes, I have the choice to forgive others as well. The sun brings a calmness over me and helps me to feel relaxed.

The sun is a reminder that God is watching over me and I don't have to worry because I am in God's hands.

Even when I cannot see the sun and the clouds are covering it, I still know it is there because the light is still around me, just like how God is always there for me.

I may not be able to physically see God but I know he is always present. Even when the sun sets and the sky fills with darkness I am still reminded that the sun will rise again in the morning.

In the Bible verse Psalm 113:3, it says from the rising of the sun to its setting the name of the Lord is to be praised. I think this means that we should give thanks to God and honor him all day long.

As you can see in each of my pictures, the sun looks so different but they are all the same sun, just like God's love may look different to others.

In conclusion, the sun gives birth to many forms of life here on earth and helps all types of living things grow. I am thankful for the daily reminder of God's love for me every time I see the sun. No matter where I am in the world, the sun will always be there; just as God will always be there for me.

God provides a stability in my life that goes beyond the brief light that is found in expensive things. The sun makes me realize that not everything important in life has to come in a package or box. If I want to feel spiritually satisfied, I need to place my trust in God instead of the "material stuff". God gives us all we need in life through faith. I hope the next time you look at the sun, you will think of God too.
